PERSONAL PROFILE

I am a results-driven Data and Technology Risk Analyst with strong expertise in data analytics, IT audit, system controls assessment, and digital transformation. With hands-on experience across multiple ERPs including SAP S/4HANA, Oracle, Flexcube, Finacle, Calypso, T24, and Sage. I specialize in data integrity testing, process automation, revenue assurance, and technology risk evaluations for large financial institutions. I have a technical foundation in Alteryx, Python, SQL, R, Power BI, and Power Query, which I deploy to build scalable analytics solutions, automate workflows, and support IT audit and forensic investigations. My background in financial analysis and Chartered Accountancy further strengthens my ability to bridge the gap between finance and technology, delivering insights that enhance operational efficiency, compliance, and system reliability.

I excel in dynamic, technology-driven environments, collaborating effectively with cross-functional teams and stakeholders across different countries. Highly analytical, detail-oriented, and proactive, I bring strong problem-solving abilities and a continuous improvement mindset to every engagement.

CAREER OBJECTIVES

- To work in a highly reputable firm with an enabling environment to gain the opportunity to achieve excellence through hard work, skills utilization, and perseverance.
